

Royal Grass® Sense

frizzy
soft

Perfect for

- Green roofs
- Decorative gardens (e.g. front lawns)
- Green surfaces on balconies
- Around buildings
- Presentation purposes

Unique fibres with an unrivalled appeal

Since the beginning of this century, Royal Grass® has been focusing exclusively on artificial grass for landscaping. The brand has a reputation of being one of the most innovative brands in the world. Among other things, it has developed the V-shape, MiNT® technology and ReaDY®. These innovations give the grass its unrivalled resilience, the ultimate natural look, a matte finish and a unique softness.

Sense is the youngest member of the Royal Grass® family: a beautiful, soft and lifelike quality. There's no other quality with a frizz as nice as the Sense. This makes it an ideal quality if you don't care too much about how intensively it can be used but care all the more about the appearance.

Additional advantage

Its voluminous look. Every fibre of grass curls in its own way and behaves independently of the other fibres making your lawn look airy and playful.

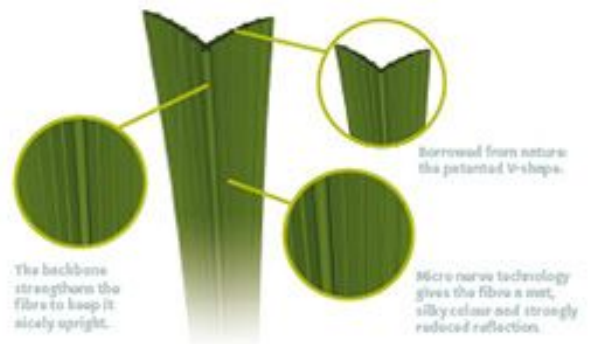

Colour

Bright green

Installation advice

To give the grass maximum stability, it is recommended to spread special dried silica sand in the lawn: approx 10 kg/m².

MINTE TECHNOLOGY
reduced reflection
